

Adjustion of vertical axis of factory set Fiskars FT-65SS hinge.

Necessary tools: 4 mm Allen key

Work process:

1. If you wish to lift the door, turn the upper screw of the hinge (counter-clockwise up to 3 turns),
2. turn the lower adjustment screw counter-clockwise as much as the upper one.
3. If you wish to lower the door, turn the lower adjustment screw (clockwise up to 3 turns),
4. turn the upper screw clockwise the same amount as the lower one.

Adjustion of horizontal axis of factory set Fiskars FT-65SS hinge.

Necessary tools: 3 mm Allen key, oblate screwdriver.

Work process:

1. Open the fixation screw with the Allen key (up to 3 turns clockwise).
2. Adjust the hinge from the adjustment screw using screwdriver (max 2.5 turns clockwise or 1.5 turns counter-clockwise).
3. Tighten the fixation screw by turning it counter-clockwise.
