User instructions

Haapsalu Uksetehase AS gives its quality doors a **two year** guarantee. Doors of the **Trendoor** series have a **three year** guarantee. Guarantee covering defects by reason of faulty material or workmanship does not cover deviations in quality due to normal wear and tear, for example, wearing off of the finish of the threshold, changes in door adjustment, etc. In order to enjoy our products for years, we strongly recommend to abide by the following recommendations and instructions.

In order to keep this guarantee valid, it is forbidden to:

1. Use or store interior doors or their details (door frames, thresholds) in unheated or damp rooms.
2. Store interior doors or their details in conditions where they are in contact with water or allocated to constant moisture.
3. To alter the size of the doors or door frames by sawing.
4. To fasten non-standard fittings on doors or door frames (when fittings are needed, please consult our sales Representatives).
5. To damage doors or door frames mechanically.
6. To allocate painted or varnished surfaces or seals to chemicals.
7. To repaint or varnish doors or their parts.

Use and maintenance instructions:

1. Make sure regularly that the lock, hinges and handle are fastened and work properly. Tighten the screws, if needed.
2. Clean the surface of painted, varnished or laminated doors with soft cloth and household cleansing agents of general purpose diluted with water in indicated ratio.
3. For cleaning doors with teak veneer, use dry cloth. If needed (recommended once a year), renew the finish of the door surface with shading wood protective agents Kolorex Protect (Tikkurila) or Valtti Color Extra (Tikkurila).
4. Lubricate (preferably with silicone oil, which does not stain and is in aerosol container) hinges, tumbler and latch-bolt at least once a year. In case of a garage door, lubricate also the moving parts of the lifting mechanism and working surface of the bar.
5. Do not attempt to open or close the door by force, if it is difficult due to the contact between the frame and the panel you might damage the frame or the panel. Adjust the position of the door panel, because there have been changes in the construction of the building, wood has swollen due to dampness or hinges or the lock have been loosened a bit. Please turn to the company, which installed the door, if help needed.
6. Keep doors (especially doors with glass) from closing with a swing due to the draught.
